

# Tac Net APU Company Profile

## Company Overview

**Tac Net APU** stands as a distinguished and dependable security service provider, specializing in a comprehensive range of security solutions such as armed escorts, anti-poaching initiatives, armed response, farm security, armed static protection, alarm monitoring, and technical services.

Motivated by the escalating incidences of Truck High Jackings, rhino poaching, and the concerning crime rates in South Africa, Abri Pienaar leverages his extensive 23 years of experience in the security industry, particularly in Anti-Poaching. As the deputy chairperson for Humewood SAPS CPF, Abri Pienaar founded to offer clients a highly skilled and professional security option.

## Goals

- First and foremost, safeguard our clients, their assets, properties, and wildlife.
- Attain recognition for unwavering professionalism in all client interactions.
- Establish acclaim for employing superior techniques, training, and real-life experience in our security personnel.
- Garner high regard among clients, prospective clients, referrals, and within the industry.
- Minimize loss for our clients

## Service Delivery Strategy

- Recruitment of experienced, professional, qualified, and highly trained staff.
- Utilization of state-of-the-art equipment and firearms.
- Comprehensive planning, preparation, and execution of all tasks.
- Implementation of unique strategies tailored to each situation.
- Centralized monitoring and coordination through our in-house 24-hour control room.

# State-of-the-Art Secure Facility

At **Tac Net APU**, we take pride in our Secure Facility, the cornerstone of our unwavering commitment to delivering unparalleled security services. This facility represents the operational heart of our company, meticulously designed to uphold the highest standards of excellence in security.

## Integrated Control Room and Administrative Offices

At the core of our facility is the state-of-the-art Control Room, equipped with the latest in surveillance and monitoring technologies. This pivotal space enables real-time operational oversight, ensuring swift and efficient responses. Complementing the Control Room are our various administrative offices, including a fully-equipped boardroom, designated for strategic planning and operational meetings, thus fostering effective communication and decision-making.

## Specialized Warehouses with Enhanced Security

Our facility features two purpose-built warehouses, each serving critical operational needs with unparalleled security measures:

### Operations and Armory:

This warehouse is not only the operational backbone of our services but also a fortress of protection. Before one can access the secure storage facility within, they must navigate through five distinct layers of security. These layers are designed to deter, detect, and deny unauthorized access, ensuring the utmost safety of our operations, personnel, and high-risk client assets. The warehouse houses our Operational Offices and Armory, making it a hub for mission preparation and execution. It also offers secure storage solutions for clients' high-value items, all while being safeguarded by the most rigorous security protocols in the industry.

### Armed Protection Unit and Wellness Space:

Dedicated to our Armed Protection Unit, this warehouse serves as both their operational base and a wellness center, featuring a fully-equipped gym to support our officers' physical fitness. It also hosts the office of the Armed Escort Manager, centralizing command and coordination for our protection services.

## Uncompromised Security Measures

To ensure the highest integrity of our Secure Facility, the entire area is monitored round-the-clock by CCTV cameras and alarm systems. The premises are further secured with an electric fence and sophisticated biometric access control systems, ensuring that only authorized personnel can enter. A stationed guard post adds an additional layer of security, embodying our zero-tolerance approach to safety and securing a safe environment for our operations, staff, and the assets of our clients.

# Our Services

At **Tac Net APU**, we pride ourselves on offering a broad spectrum of top-tier security services tailored to meet the diverse needs of our clients. Our commitment to safety and security is unwavering, as we deploy a multifaceted approach to protect lives, assets, and properties. Our team of highly trained and experienced security officers is at the core of our operations, ensuring peace of mind for our clients across various sectors. Below, we will provide an introductory overview of our specialized security services. Following this introduction, we will delve into an in-depth explanation of each service to give you a clearer understanding of how we can serve your security needs.

- **Armed Escorting:** Providing secure transit for individuals and valuable assets across different locations.
- **Guarding:** Offering vigilant protection for premises to deter unauthorized access and activities.
- **Armed Guarding:** Enhancing security measures with armed personnel for heightened threats or high-value properties.
- **Alarm Monitoring & Response:** Delivering rapid response solutions to alarm triggers, ensuring swift action is taken to secure the site.
- **Technical Services:** Utilizing advanced technology to support security measures, from surveillance systems to access control.
- **Anti-Poaching:** Specialized services aimed at protecting wildlife and natural resources from illegal hunting and poaching activities.
- **Tracking & Recovery:** Employing cutting-edge tracking technologies to locate and recover stolen assets or vehicles.
- **Close Protection:** Providing personal security for VIPs, executives, and individuals requiring dedicated protection.
- **High Value Parcel Logistics:** Ensuring the safe and secure transport of high-value goods with specialized handling and delivery protocols.

Our officers are the backbone of our operations, and their professionalism, skill, and dedication are what set **Tac Net APU** apart in the security industry.

Rigorously trained and equipped to handle a variety of security challenges, our team is ready to serve and protect. Stay tuned for a closer look at each of these services, where we will share insights into our operational excellence and strategic approach to security.

## Armed Escorting

**Tac Net APU** excels in providing top-tier armed escort services, particularly specializing in securing the precious metals industry. Our extensively trained Armed Escort Teams boast proficiency in threat assessment, route planning, and crisis management. Equipped with a diverse arsenal, including handguns, high-caliber rifles, or shotguns, our teams deploy a meticulously maintained fleet of unmarked, marked, and armored vehicles tailored to the unique operational requirements of each assignment.

We cater to both local and national escort needs, ensuring the safe and secure transportation of valuable cargo to any desired locations. **Tac Net APU** has ample resources to facilitate multiple teams simultaneously, providing the flexibility to move multiple trucks at the same time.

In addition to our core armed escorting services, **Tac Net APU** goes beyond conventional security measures. We offer specialized Container

Clamping & GPS Tracking services to fortify the protection of valuable cargo. Our vehicles are equipped with cutting-edge camera systems featuring GSM connection to our control room for live viewing. These cameras boast AI capabilities for situation monitoring, enhancing our ability to proactively address potential threats and challenges.

The entire convoy is tracked and monitored by a dedicated Armed Escort Controller, ensuring real-time oversight and coordination. With an unwavering commitment to precision and efficiency, **Tac Net APU** ensures the safe and secure transportation of valuable cargo by implementing advanced security protocols. Our comprehensive armed escort service is designed to meet the diverse needs of our clients, guaranteeing a seamless and safeguarded transportation experience.

# Guarding Services

**Tac Net APU** is dedicated to providing top-tier Guarding services. Our security personnel undergo rigorous training in conflict resolution, customer service, and surveillance techniques. Whether securing commercial spaces, residential areas, or events, our guards prioritize safety and vigilance. **Tac Net APU** is committed to delivering unmatched security solutions to meet your specific needs.

In addition to our core guarding services, we employ advanced communication and monitoring systems to ensure the highest level of security. Our guards are in direct radio communication with our control room, where a security supervisor is continuously monitoring the radio for prompt response. Each site is equipped with a dedicated WhatsApp group, facilitating real-time communication for site reports and instructions, enabling clients to interact directly with active guards on site.

Before assuming responsibility for any guarding site, **Tac Net APU** conducts a comprehensive risk evaluation led by our security specialists. This process allows us to understand the full extent of the client's safety requirements. Furthermore, we offer clients the option of enhancing their security infrastructure with a range of camera and alarm system improvements tailored to their specific needs.

As part of our commitment to proactive security, **Tac Net APU** provides stand-alone wireless panic kits connected to our control room. In the event of a panic, multiple intervention units are dispatched immediately to assist and address the situation swiftly.

Our strong partnerships with 3rd party suppliers, such as ATG (At the Gate), enhance our security capabilities. Our guards can efficiently scan and log all vehicle and visitor entries into the property using a mobile license disk and ID scanner. This data is accessible in real time by both the client and our control room, ensuring comprehensive and up-to-date information for enhanced security measures.

Furthermore, throughout normal days, **Tac Net APU** implements additional monitoring measures by conducting random visits to the site by supervisors, armed intervention units, and management. This proactive approach ensures constant vigilance and reinforces our commitment to the safety and security of our clients' premises.

# Armed Guarding Services

Tac Net APU's Armed Guarding division specializes in securing high-risk sites, deploying a minimum of two experienced officers per team. Our armed guards are strategically placed to provide enhanced security measures tailored to the unique challenges of each assignment.

These skilled teams have the flexibility to conduct roaming patrols with a designated vehicle or opt for static guarding without a vehicle, adapting to the specific requirements of the site. Their experience in the armed guarding industry equips them with the knowledge and vigilance needed to effectively assess and respond to potential threats.

In addition to standard equipment, our armed guards are issued bulletproof vests, a mandatory piece of gear that must be worn at all times. This crucial safety measure underscores our commitment to the well-being of our personnel and enhances their capability to respond to security challenges with confidence.

As part of our comprehensive armed guarding services, **Tac Net APU** implements rigorous security protocols to ensure the highest level of protection. Any suspicious activity reported is promptly investigated by our intervention units. Leveraging our extensive network, which includes collaboration with various other security companies, and multiple members of SAPS Flying Squad, K9, and TRT units, we ensure a swift and coordinated response to potential threats. This collaborative approach reinforces our commitment to proactive security measures, providing an added layer of protection for our clients and their assets.

# Alarm Monitoring & Response

In the realm of residential and commercial alarm monitoring, **Tac Net APU**'s commitment to unparalleled security extends to the smallholding areas of Chelsea and Theescombe on the outskirts of Port Elizabeth. With a proven track record of numerous successes in this region, our specialized response department has become an integral part of the community's safety infrastructure.

At the heart of our success lies a meticulously crafted set of protocols that ensures an unparalleled level of security. Our armed response department takes pride in boasting one of the fastest average response times, a testament to our dedication to protecting the Chelsea and Theescombe communities.

Upon receiving an alarm activation, our newly developed state-of-the-art control room swiftly dispatches armed response teams. Notably, our protocols prioritize immediate action, with the control room initiating the dispatch before contacting the client. This proactive approach significantly reduces response times, allowing our highly trained response officers to be on-site swiftly.

To further enhance our response capabilities, **Tac Net APU** employs cutting-edge technology. Our **Tac Net APU** Maps app plays a pivotal role in expediting our response process. This application securely stores the precise pin location of all our clients in Chelsea and Theescombe, ensuring our response officers can navigate swiftly and effectively to the scene.

Clients in these areas benefit not only from rapid response times but also from direct and efficient communication channels. **Tac Net APU** has established tailored emergency WhatsApp groups for specific suburbs, fostering direct communication between our clients and our comprehensive security network. This personalized approach not only enhances overall responsiveness but also empowers clients with real-time updates and a sense of control over their security.

Moreover, our entire security ecosystem, including the control room, response team, supervisors, and the management team, is equipped with **Tac Net APU** Android devices. This ensures that they can collectively and

proactively monitor the WhatsApp groups directly. This seamless integration allows our highly trained professionals at every level to stay connected, receive instant alerts, and respond promptly to any client inquiries or updates within the dedicated communication channels.

In addition to our robust response teams, **Tac Net APU** ensures direct backup from intervention units. We maintain direct communication channels with the SAPS Flying Squad and K9 units, facilitating seamless collaboration in emergencies and reinforcing the efficiency of our security response.

All our response vehicles are equipped with GPS tracking units, enabling live monitoring by the control room. This real-time tracking ensures that our vehicles can navigate efficiently to the scene.

Furthermore, we extend our vigilance by tracking the hand radios of our response officers, allowing us to monitor their movements at all times. This comprehensive approach ensures not only the security of our clients but also the safety and accountability of our response teams..

Looking ahead, **Tac Net APU** is committed to extending its exceptional armed reaction service to neighboring suburbs. As part of our ongoing dedication to community safety, we are actively planning to expand our services, bringing the same level of security and responsiveness to a broader

residential and commercial landscape.

In summary, **Tac Net APU's** comprehensive security solutions, coupled with specialized protocols, advanced technology, direct communication through WhatsApp groups, and collaborative partnerships, make us the trusted choice for residents and businesses in Chelsea and Theescombe. Stay tuned as we work towards extending our exceptional armed reaction service to enhance the security of neighboring suburbs

# Technical Services

**Tac Net APU** is distinguished for its comprehensive range of technical services, emphasizing excellence from the initial design phase through installation and ongoing maintenance. Our dedicated departments of skilled technicians collaborate closely with clients, delivering cutting-edge solutions tailored to meet their specific security needs. Our service portfolio encompasses Electric Fencing, standard and AI integrated CCTV systems, Alarm Systems, and Access Control Systems.

In addition to our diverse service offerings, **Tac Net APU** takes pride in integrating advanced monitoring software designed to enhance the efficiency and effectiveness of our technical services. Within this system,

our technical coordination department plays a crucial role, utilizing a specialized section of the monitoring software that allows them to access all pertinent information about clients' alarm systems instantly.

This innovative monitoring software features custom scheduling capabilities, enabling our technical coordinators not only to ensure the timely dispatch of our technicians but also to facilitate seamless communication between clients and the control room.

The software provides a real-time overview of the tasks required on-site, the GPS location of the site, and detailed client information. Housed in our state-of-the-art control room, our technical coordination department acts as the central point of contact for any after-hour assistance, ensuring swift resolution of urgent matters. This coordination extends to our fleet of technical vehicles, each equipped with live GPS tracking for enhanced control over the movements of our multiple technical teams.

**Tac Net APU** distinguishes itself by adopting a unique team-oriented approach. Instead of a singular team structure, we deploy multiple teams, each composed of two senior technicians. This strategic decision leverages their collective wealth of experience, empowering our technical teams to address any technical challenges with comprehensive expertise and collaborative problem-solving capabilities.

In summary, **Tac Net APU** not only delivers top-notch technical services but also prioritizes technological innovation, efficient coordination, and a team-based approach to ensure unparalleled security solutions for our esteemed clients.

# Anti-Poaching

Guided by an unwavering commitment to wildlife preservation, **Tac Net APU** has been a stalwart force in the anti-poaching effort since its inception. Our core competency lies in delivering comprehensive anti-poaching services, employing cutting-edge strategies and highly trained personnel to actively counter poaching activities. While our roots are embedded in the Port Elizabeth area, our dedication extends to any location seeking our assistance.

Beyond our central anti-poaching mission, **Tac Net APU** extends its protective mantle to encompass the safeguarding of various wildlife estates. Our armed reaction officers are not only devoted to ensuring the safety of residents but also prioritize the well-being of the wildlife inhabiting these estates.

Our steadfast commitment to ethical wildlife protection is underscored by rigorous adherence to guidelines. **Tac Net APU** plays a pivotal role in supporting game farms, deploying vigilant surveillance and strategic interventions to protect endangered species, contributing significantly to regional conservation efforts.

**Tac Net APU's** dedication to preserving green zones within the

Nelson Mandela Bay Metro has resulted in numerous successes. The community's observations of wildlife returning underscore the positive impact of our efforts in these areas.

Operating with a holistic approach, our anti-poaching teams maintain direct communication channels to intervention units. The live tracking of our teams via radio in our control room ensures swift and precise responses to potential threats, thereby enhancing our overall effectiveness.

Our reporting system remains a cornerstone of our anti-poaching initiatives, allowing teams to instantly share findings on a dedicated WhatsApp group. Monitored by the control room, intervention units, supervisors, and management, this efficient communication ensures that stakeholders are promptly informed and facilitates coordinated responses.

**Tac Net APU** continues to stand as a stalwart defender of wildlife and endangered species, responding to requests for assistance beyond the Port Elizabeth area. Our commitment to anti-poaching has evolved into a multifaceted service, encompassing wildlife estate safeguarding and community engagement, establishing us as a reliable and comprehensive partner in ongoing conservation efforts both regionally and beyond.

# Tracking & Recovery

At **Tac Net APU**, our Tracking & Recovery service, in collaboration with BayTrac, delivers comprehensive GPS tracking solutions for both corporate fleets and personal vehicles. Leveraging cutting-edge technology, we ensure the safety and security of your assets, offering real-time monitoring and rapid response capabilities.

Our team ensures the seamless installation of GPS Tracker units in your corporate or personal vehicles, each equipped with an advanced emergency panic button that not only triggers immediate assistance in crisis situations but also features two-way calling for enhanced communication.

Upon activation of the panic button, our dedicated control room springs into immediate action. Trained personnel will dispatch relevant response teams promptly to the location, ensuring a swift and effective response.

Vigilantly monitoring the movements of your corporate fleet in Port Elizabeth, we implement and enforce restrictions such as over speeding alerts and notifications for entering or leaving predefined geo-zoned sections.

Tailored for high-profile or critical employees, our mobile VIP panic tracker ensures personal safety. The multifunctional panic button, when pressed, initiates a call to our control room, allowing real-time communication. Armed reaction units are immediately dispatched to the device's location for heightened security.

For temporary monitoring of cargo or vehicles, we deploy discreet and mobile magnetic tracking units with a battery life of approximately 5 days. This offers enhanced safety and investigative capabilities as needed.

As a complementary feature, **Tac Net APU** provides clients with advanced Fleet Management capabilities through our client-side platform. This empowers clients to independently manage their corporate fleet, including real-time monitoring of vehicle health, fuel consumption tracking, and maintenance scheduling.

Our control room operates 24/7, with a dedicated controller overseeing all tracking and emergency response operations. Equipped with the necessary resources, they can handle any situation that may arise.

Through longstanding partnerships, we maintain direct communication channels with SAPS Flying Squad and K9 units, ensuring additional assistance can be swiftly mobilized when required. This collaboration enhances the overall effectiveness of our tracking and recovery services.

At **Tac Net APU**, we prioritize security, providing our clients with peace of mind, knowing that their assets, fleets, and personnel are protected by a robust and responsive tracking and recovery system, complemented by advanced Fleet Management capabilities on the client side.

## Close Protection

**Tac Net APU** extends its commitment to security with our Close Protection Officers (CPO) service, providing a discreet and highly skilled personal security detail for individuals requiring an elevated level of protection. Our CPOs are meticulously selected, trained, and equipped to ensure the safety and well-being of our clients in various environments.

Our CPO service is tailored to meet the unique security needs and lifestyle of each client. Whether for high-profile executives, public figures, or individuals facing specific threats, our CPOs adapt to the situation with precision.

**Tac Net APU's** CPOs undergo rigorous training in risk assessment, defensive driving, crisis management, and conflict resolution. Their expertise ensures a proactive and adaptive approach to security challenges.

Our CPOs maintain a low-profile yet vigilant presence, blending seamlessly into their surroundings while remaining ready to respond swiftly to any potential threats. This ensures the client's comfort and peace of mind.

Whether at home, in transit, or at public events, our CPOs provide comprehensive security coverage. From secure transportation arrangements to meticulous route planning, we prioritize the safety of our clients during all aspects of their daily lives.

Prior to any assignment, our CPOs conduct thorough advance planning and threat assessments. This proactive approach allows for the identification of potential risks and the implementation of strategic security measures.

Our dedicated Control Room operates around the clock, providing continuous support to our CPOs in the

field. This centralized hub ensures real-time coordination, communication, and response capabilities.

the event of a security breach or emergency, our CPOs are trained to implement swift and effective emergency response protocols, prioritizing the safety and protection of the client.

**Tac Net APU's** CPO service reflects our unwavering commitment to providing elite security solutions. Whether safeguarding individuals during public appearances, travel, or everyday activities, our Close Protection Officers exemplify the highest standards of professionalism, ensuring a secure environment for our valued clients.

# High-Value Parcel Logistics

**Tac Net APU** proudly presents High-Value Parcel Logistics, an exclusive service crafted in collaboration with the esteemed Ferrari Group. This specialized offering focuses on the secure collection and delivery of high-value parcels arriving on international or national flights. Our dedication to the safety and reliability of each high-value item is encapsulated in the name "High-Value Parcel Logistics."

High-Value Parcel Logistics seamlessly connects with international and national flights, providing clients with a comprehensive logistics solution regardless of the parcel's origin. Our expansive reach ensures a secure and efficient delivery network.

Through our strategic collaboration with the Ferrari Group, High-Value Parcel Logistics integrates into a global logistics network, aligning with international standards to ensure secure movements of high-value parcels from diverse origins.

The core focus of High-Value Parcel Logistics is the secure collection and delivery of high-value parcels. Our stringent security measures, both in transit and within our facilities, prioritize the safety and integrity of each valuable item entrusted to our care.

High-Value Parcel Logistics specializes in personalized and secure door-to-door logistics. Whether high-value parcels arrive on international or national flights, our dedicated team ensures a smooth and secure journey from the point of collection to the final destination.

Utilizing cutting-edge tracking technology, High-Value Parcel Logistics provides clients with real-time visibility into the status and location of their high-value parcels. This transparency enhances confidence and allows for informed decision-making throughout the logistics process.

Our handling facilities are equipped with state-of-the-art security measures, encompassing surveillance, access controls, and personnel training. These measures underscore our commitment to maintaining the security of high-value parcels in transit.

High-Value Parcel Logistics is supported by a dedicated customer support team committed to providing assistance, updates, and a positive client experience. Our team is ready to address inquiries and ensure a smooth logistics process for our valued clients.

**Tac Net APU's** High-Value Parcel Logistics encapsulates the essence of our commitment to the secure and efficient collection and delivery of high-value parcels arriving on international or national flights. Clients can trust High-Value Parcel Logistics to provide a tailored and transparent logistics solution for their most valuable items.
